

# DERMEDICS™ CRYO GEL

**MEDICAL QUALITY**

**DERMEDICS™ CRYO** is a cooling gel designed especially for laser medical therapy. It helps to reduce painful skin discomfort during the treatment by absorbing, in the minimum level, the energy of laser beams. It does not have any negative influence on laser effectiveness.

It can be used also for aesthetic medicine treatments.

## Overview

- Medical quality with CE mark
- Protects skin from overheating
- Minimises painful sensations from laser without reducing efficacy
- Has high resistance to drying (high viscosity)
- Neutral pH
- Microbiologically pure
- Transparent colour
